

## SANDSTORM LEDGE RECOVERED

GOLDFIELD, Oct. 15.—The main ledge of the Sandstorm which faulted and was lost a few feet above the 200 level, has been found again and promises to afford another long period of prosperity to the mine. According to Chas. Wilkerson, who has been personally directing the search for the lost ledge, at a depth of 25 feet below the 200 foot station and east 50 feet from the shaft, at which point the lead was picked up and a winch sunk, the ore shoot has opened out into twenty five feet of gold bearing rock. While reluctant to give values in gold figures Mr. Wilkerson admitted that the ore is of a good grade.

At another point on the same level the fissure has been picked up and a drift is connecting the two districts. In this place a raise is being extended into ore of a good class, and the Sandstorm promises to add another sensational chapter to its history in the next few months.

## IN ABEYANCE

At the regular meeting of the Leisure Hour Club last Wednesday evening it was decided to buy the lot opposite the school house, in the rear of the Presbyterian Manse if the necessary amount for its purchase could be obtained.

The matter is still in abeyance as the amount has not yet been secured.

## FINE GALENA PROSPECTS

Geo. W. Slater, who is interested with C. J. Durbrow, secretary of the Selby Smelting company, and A. B. Hennessy, in the lease and bond on the Emerson galena property in Red Canyon, has been examining the property this week, and is very much pleased with it. Besides having a bond on the Emerson group these parties have made several locations of their own adjoining the Emerson ground. The tunnel being run on one of the original claims to tap the ledge which crops on the surface is now in a distance of 85 feet and the face is showing lead carbonates. The ledge will undoubtedly be cut in the next eight or ten feet.

One from this ledge at a depth of 35 feet from the surface gives values of \$20 to \$100 per ton in lead silver and gold.

In all probability a company will be organized as soon as Mr. Slater returns to Oakland and the property taken over at a price of \$20,000.—Enterprise.

## PRICE OF COPPER ADVANCES

Copper has reached the highest price attained during the past quarter of a century, selling at 21 1/2 cents, and in spite of the heavy production there is a scarcity of the red metal. The rapidly increasing use of electricity has created a demand for copper that absorbs stocks as fast as they are put on the market, and there is no apparent danger of the market being glutted.

Miss Rita Castle, Miss Eleanor Williams and Miss Ruth Williams were visitors yesterday and Saturday from Gardnerville and the surrounding districts.

Edward Kirkwood and wife will make this city their home this winter.

Frank Galvin, who has been very ill with typhoid at the Park Hotel, is reported slightly better today.

## WALKER LAKE RESERVATION KIND WORDS FROM THE OPPOSITION

Monday, October 29th, promises to be a lively day in the annals of Nevada history, as on that day the Walker Lake reservation will be thrown open to settlers and many "sooners" are already on the ground and have been for a month, awaiting this opportunity to secure land that is known to possess valuable mineral deposits.

Carson City will send a number of locators and they are all gritty young men determined to be second to none in location.

Inquires are received here nearly every day by the editor of this paper and to answer them would require a private secretary and a good bank account for stamps.

The outside world is evidently bent upon getting into our state which is one of the largest states in the Union and we do not say them "nay" for desirable citizens are always welcome.

## FESTIVAL AND DANCE

## NOVEL SUICIDE

NEW YORK, Oct. 15.—A dispatch from Rio Janeiro published here says that Vicente Almeida, a well known member of society, committed suicide. He invited a number of his friends to dinner and afterwards led them to a cage of lions he had hired from a traveling menagerie.

When all were watching the animals and chatting, the Viscount opened the door of the cage and entered. The lions pounced upon him and he was frightfully mutilated before he could be dragged out. It is said he was overwhelmed by gambling debts.

## GREAT COPPER DISTRICT

"Greenwater is going to be the greatest copper camp in the world. Ely and Butte and Bingham with all have to take a back seat when work gets under way there. The deposits are simply marvelous and can't be described," said an investor who returned from that section last Thursday night.

The country is traversed by a series of big porphyry dikes traveling from southeast to northwest through the granite, which have been traced for a distance of twenty miles on their strike. The width of the belt is known to be at least six miles, and from the peaks of the Furnace Creek mountains the ore channel can be clearly seen in the Panamint range on the west side of Death Valley. The formation is the same as Butte but the surface veins are larger and richer than any that have ever been discovered in the wide world.—Goldfield Tribune.

W. W. Booth editor of the Tonopah Bonanza, a radical republican paper, has the following to say of the democratic candidate for secretary of state:

"The number of friends on the opposite side of the fence places this paper in a very paradoxical position. We can only reconcile ourselves with the tradition that 'politics make strange bed fellows.' Accordingly we wish to acknowledge the courteous call at the Bonanza office yesterday of Frank P. Mannix, democratic nominee for secretary of state. We can fully console ourselves with the knowledge that no matter how the tide may go, the Secretary of State of Nevada will be in good hands. We wish Mr. Mannix well."
